

Endoscopy Mask

Allows endoscopy and simultaneous ventilation during fiberoptic intubation, bronchoscopy and upper gastrointestinal endoscopy. The administration of analgesic gases during endoscopic procedures improves patient comfort and the quality of the procedure (1,2). It prevents hypoventilation and desaturation for increased patient safety.

Order information

Endoscopy Mask / For single use

Size	Membrane	REF	Box
Small	2.0 mm I.D.	30-40-111	10
Medium	3.0 mm I.D.	30-40-333	10
Large	5.0 mm I.D.	30-40-555	10
Large	10.0 mm I.D.	30-40-777	10

Fixation Tape / For single use

Patient	REF	Box
Adult	35-30-255	10

Fixation Tape / Reusable

Patient	REF	Box
Child	35-70-155	10
Adult	35-70-255	10

Additional information
